## VERIFICATION OF COMPETENCY (VoC)

Course Length	Taught Hours	Practical	Knowledge
2 days	16	✓	✓

### Target Audience

This course is for employers and/or organisations seeking to ensure and demonstrate their EEHA competent electrical and instrumentation personnel continue to be compliant. Verification of current competencies is essential and stipulated by Australian Onshore and Offshore Health and Safety legislation. Most energy development projects in Australia demand that vendors ensure their employees have their competencies verified.

### Selection Requirements

- Previously attained competencies covering Installation, Maintenance and/or Detailed Inspection for EEHA from the UEE11 Training Package; and
- Hold a current electrical license.

### Units of Competency

UEENEEM080A Report on the integrity of explosion protected equipment in HA  
 UEENEEM020A Attend to breakdown in hazardous areas - gas atmospheres  
 UEENEEM022A Attend to breakdown in hazardous areas - pressurisation  
 UEENEEM024A Install explosion protected equipment and wiring systems - gas atmospheres  
 UEENEEM026A Install explosion protected equipment and wiring systems - pressurisation  
 UEENEEM028A Maintain equipment in hazardous areas - gas atmospheres  
 UEENEEM030A Maintain equipment in hazardous areas - pressurisation  
 UEENEEM039A Conduct testing of hazardous areas installations - gas atmospheres  
 UEENEEM041A Conduct testing of hazardous areas installations - pressurisation  
 UEENEEM042A Conduct visual inspection of hazardous areas  
 UEENEEM044A Conduct detailed inspection of hazardous areas installations - gas atmospheres  
 UEENEEM046A Conduct detailed inspection of hazardous areas installations – pressurisation

### Course Content

This Verification of Competency process assesses current EEHA knowledge of the individual and addresses hazardous area specific changes which have occurred over the past few years. The candidate will need to demonstrate the application of practical skills and underpinning knowledge against installation, testing, maintenance, visual and detailed inspection requirements in alignment with the relevant AS/NZS standards.

### Assessment

VoC is an 'Assessment Only' process that combines both practical and knowledge based assessments in order to ascertain whether the individual has the capability to install, maintain and test equipment aligned with the AS/NZ Standards and competently conduct practical Detailed Inspections on Ex d, Ex e, Ex i, Ex p and Ex n equipment.

### Outcome

Upon completion of the two day Verification of Competency period, the Trainer & Assessor will compile a detailed report verifying the observed level of competency against the competencies as per the IMDI Skill Set from the UEE11 Training Package. This is recorded in the MOXI Training Management System for the relevant candidate, issued and sent to the employer.
